- ongoing network campaign to strengthen network perception

2 building on success of Q1 campaigns

Smoothest network

Go No Limit price plans

dtac reward CRM program

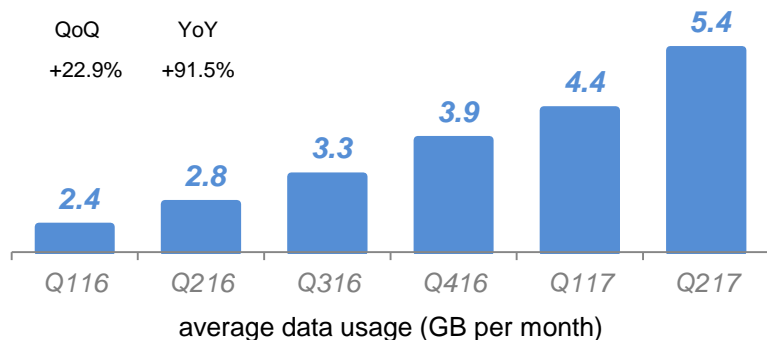

3 continue improving operational efficiency

- revenue returns to growth despite lower spending
- highest level of EBITDA margin in more than a decade

4 potential 2300MHz deal with TOT

- selected by TOT as preferred bidder
- reduce spectrum uncertainty
- **60MHz** additional bandwidth
- **THB 4.51b** fixed annual payment

network densification to accommodate data growth

- overall network coverage: **94%** of population
- massive 4G network coverage expansion
- strong data usage growth
 - ARPU on an upward trend
 - data revenue growth has accelerated, registering a **27% YoY** growth in Q217

continued strong postpaid and 4G growth

strong postpaid growth, mainly driven by Go No Limit plans and prepaid-to-postpaid migration

6.5m 4G subscribers, growing strongly thanks to ongoing expansion of 4G network and device offers

prepaid trending down as a result of migration to postpaid and dtac being more focus on creating value

strengthening 'dtac reward' loyalty program

- **4x** increase in participating outlets over the past 3 quarters
- increase **brand dynamic** and **visibility** in high traffic areas
- best **CRM program** among mobile operators (survey of users on one of the biggest community website in Thailand)

financial highlights

ARPU on an upward trend

- 96.3% of sub base registered under DTN
- strong postpaid net adds continues
- increase in blended ARPU from higher mix of high-ARPU sub base

service revenues returned to growth YoY and QoQ

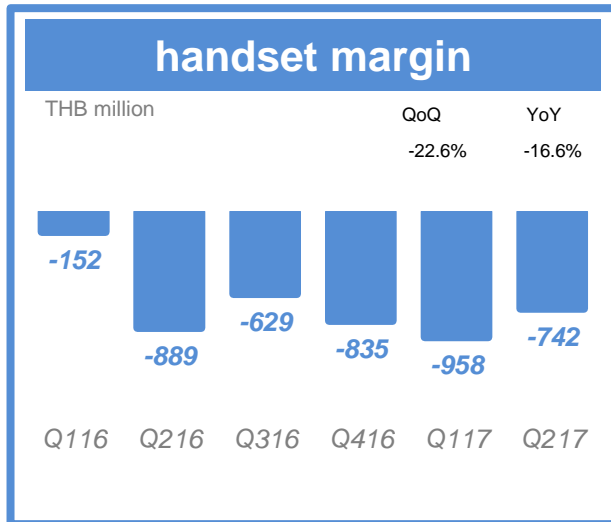

- increase in data revenue more than offset the decline in voice revenue

- data proportion continues to rise, driven by Go No Limit plans

- average data usage reached 5.4GB per month per user

handset subsidy has slowed down

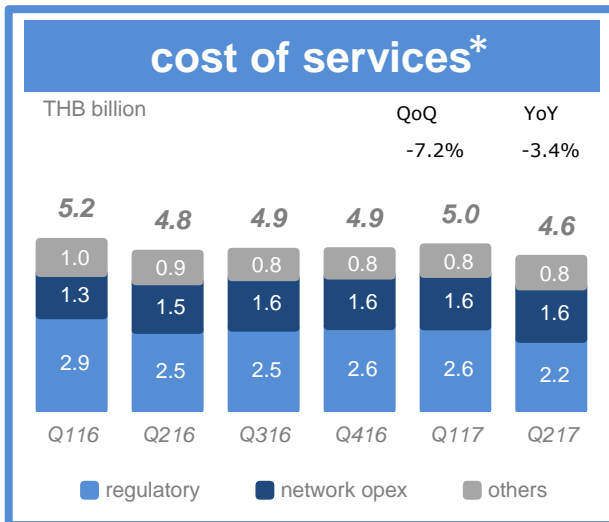

- 43.5% penetration of 4G-enabled devices
- at least 70% of 4G-enabled devices are 2300MHz-compatible

- lower handset revenue is driven by lower number of units sold and the reclassification of handset-related expenses to net off handset revenue

- handset remains an important tool to attract and retain subscribers
- on a normalized basis (2016), handset margin would have been –THB 575m in Q217 and –THB 723m in Q117.

cost of services well managed

* excluding depreciation and amortization, and IC

- regulatory costs dropped from
 - higher traffic on 2100MHz network as a result of network densification,
 - customers migrating to DTN and replacing 2G handsets
 - reduction of USO rate
- network OPEX increased only slightly despite the ongoing network densification
- cost of services well controlled amid network expansion and data traffic growth

SG&A continued to decline

- sharp drop in S&M expenses during seasonally low quarter and due to efficiency measures
- increase in provision for bad debt as a result of strong growth in postpaid segment
- gen admin expenses continued to decline from the ongoing implementation of operational excellence programs

* excluding depreciation and amortization

** excluding restructuring cost
